WORK EXPERIENCE

React Native developer at **CURZENN**, France,
remote,

Start Date: May 2022 - present.

Project Deals:

I have worked on France based projects. I was learning and grow worked as quality, design and code all supportive mobile exact same responsive screens.

N-ONE food delivery (React-Native) – it's a mobile application for food delivery app. it's nearby users order the food. N-ONE application which gives you two services at the same time meal delivery and drivers. As the restaurant accept your order then fast delivery soon as possible.

Play Store:

<https://play.google.com/store/apps/details?id=com.none.user&hl=en&gl=US>

Sur4plot (React-native) – it's a mobile application for stolen vehicle, specify stolen car details required after create account and login. if your car has been found by a driver you will get notified match immediately. You can then after payment process completed, then show will the exact location. If it is not found immediately, the day someone reports it, you will receive a notification and an email.

Play Store:

<https://play.google.com/store/apps/details?id=com.sur4plot&hl=en&gl=US>

FE2A – it's a mobile application for create accommodations, once host application user creates the account and login. then required some details gathered and upload accommodations. once uploaded accommodations validate from the user application, there are uploaded accommodations control by admin so, the admin control by if the admin will validate two options here still waiting and complete. once completed then will show the accommodations in user applications.

Implements and Integrations:

Google maps integration using user get current location.

Firebase with using social logins.

I have learned firebase account with using push notification.

I have learned using socket package using live chat.

Feather Software Solutions, on-site, Nagercoil, From: Jan-2022, To: May-2022
